

## Getting started with PDF Creator

PDF Creator is a virtual printer that allows user to convert any type of printable windows document including DOC, XLS, PPT and TXT into Portable Document Format (PDF).

Download PDF Creator, click <http://www.pdf-creator.us/free-download.php>

### Step 1

To create a PDF file directly from an application, print the document in the normal way (**Click File >> Print**), ensuring that you select **"PDF CREATOR"** as the printer. After that, click **Properties -> Advanced**, and select **72dpi** at **Graphic – Print Quality** menu. Then, click **OK** to print.

## Step 2

When the **OK** button is clicked in the Print dialog, a Create PDF dialog appears allowing you to choose the name and location of the PDF file. Click **SAVE** to complete the process.
